Top-level Sports Upper secondary school. Main subjects: Football (soccer), International English, Sociology and Social Anthropology, Politics and Human Rights, Social Studies English.

Places lived

I consider Martin as a very accomplished student, a very talented person. He learns quickly and is skilled in all ways. In the project in Frontica he has shown that he is dedicated, orderly, systematic and solution-oriented, he has the ability to quickly familiarize themselves with a complex technical system, and do what it takes to get the job done. My impression is that Martin works well with others, and that he helps to create a good climate of cooperation. I give Martin the best recommendations. My experience is that Martin has what it takes for him to master many different types of challenges, he has the right attitude combined with a bright mind.
